Randy - I wanted to make certain you were aware of the request from Oversight & Government Reform Committee (minority staff) for information in prep of the May 31st Hearing. Staff want a list of contaminants EPA found during sampling. Region 3 is pulling it together.

Just the list of contaminants, regardless of whether they are over the "trigger level"

**Subject:** Re: hearing on fracking

Zack -

The Region does not have a separate document that shows contaminants over the safe threshold. They will most likely need to create a document for you. To make certain I properly characterize your request, are you looking for contaminants over the MCL? Or, are you interested in anything that was highlighted in the on-line table (in yellow) as over the "trigger level" for the project? (The trigger levels were set below drinking water standards to flag them for expedited tox review - they're not necessarily indications of levels above a safe threshold.

Thanks

Pamela
